

Confidential Investment Brief: Salento Wellbeing Resort

An exceptional opportunity to develop a pioneering eco-integrated wellbeing resort in Italy's most sought-after emerging destination. This confidential brief presents a strategically positioned hospitality development in Salento, Puglia—designed for the discerning investor seeking sustainable returns in Europe's fastest-growing wellness tourism market.

Development Vision & Strategic Location

The proposed resort represents a sophisticated response to evolving hospitality trends, seamlessly integrating environmental responsibility with luxury wellness positioning. Located in the heart of Salento—between the historic coastal towns of Nardò, Porto Cesareo, and Gallipoli—the development offers unparalleled access to the region's cultural and natural assets.

Positioned just 20 minutes from Lecce, the "Florence of the South," and within comfortable reach of both Brindisi and Bari international airports, the site delivers the connectivity institutional investors demand whilst retaining the authentic Mediterranean character that drives premium pricing.

This is a post-pandemic-ready format focused on flexibility, wellness, and environmental balance—precisely calibrated to meet the expectations of tomorrow's conscious traveller.

Authentic Character

Protected coastal environment

Puglia: Europe's Fastest-Growing Tourism Destination

Puglia has emerged as one of Europe's most compelling tourism stories, recording exceptional growth trajectories that significantly outpace national and continental averages. The region now welcomes over **15 million tourist stays annually**, with foreign arrivals surging by an impressive **60% between 2015 and 2019**—a momentum that has resumed post-pandemic.

15M

Annual Tourist Stays

Puglia's total regional accommodation nights

60%

Foreign Growth

International arrivals increase (2015–2019)

31%

Lecce Province Share

Proportion of regional tourism captured locally

Lecce province alone attracts **31% of all regional arrivals**, positioning our development at the epicentre of demand. International recognition from *National Geographic* and *Lonely Planet* as one of Europe's top sustainable destinations has further amplified visibility amongst high-value traveller segments seeking authentic, nature-based experiences.

Rising Demand for Sustainable & Wellness Tourism

The confluence of demographic, behavioural, and regulatory trends has created a structural tailwind for wellness-focused, environmentally responsible hospitality assets. Post-pandemic traveller preferences have shifted decisively towards destinations offering space, authenticity, and demonstrable sustainability credentials.

Puglia's international accolades recognise not just its natural beauty, but its commitment to responsible tourism development—a positioning that aligns perfectly with EU green investment frameworks and ESG mandates increasingly governing institutional capital allocation.

Our development concept directly addresses this demand shift, delivering a product that meets the expectations of conscious affluent travellers whilst satisfying the sustainability criteria that unlock preferential financing and regulatory support.

Development Overview: Scale & Configuration

The development site comprises approximately **169,000 m² of tourism-zoned land** with approved buildable volume of **~95,000 m³**, translating to approximately **26,000 m² of gross floor area**. This substantial footprint enables a diversified mixed-use hospitality format that reduces revenue concentration risk whilst maximising site value.

Hotel Suites

Luxury accommodation anchoring the resort offer

Wellness Centre

Destination spa with thermal and treatment facilities

F&B Venues

Multiple restaurants celebrating Puglian gastronomy

Cultural Spaces

Edutainment programming and religious area

The development also incorporates extensive landscaped parks, structured parking for guests and visitors, and a **~1,000 m² Beach Club** with direct sea access—a critical amenity commanding premium pricing in the coastal wellness segment.

Key Development Metrics

Parameter	Value
Land Area (Tourism-Zoned)	~169,000 m ²
Buildable Volume	~95,000 m ³
Gross Floor Area (GFA)	≈26,000 m ²
Beach Club Deck	~1,000 m ²
Expansion Land Available	~470,000 m ²

The site's zoning status and approved buildable volume significantly de-risk the development timeline, eliminating the planning uncertainty that typically constrains Italian hospitality projects. Current entitlements support a sophisticated, multi-revenue-stream resort configuration.

Critically, an additional **470,000 m² of adjoining land** is available for future expansion, providing optionality for phased development and substantial upside potential as the destination matures. This land bank represents a strategic hedge, allowing investors to scale operations in response to market conditions whilst securing coastal assets in an increasingly constrained supply environment.

Functional Mix: Diversified Revenue Architecture

Hotel Suites

Premium accommodation forms the core revenue driver, designed to capture extended-stay wellness guests and shoulder-season demand.

Wellness Centre

Destination-calibre spa facilities including thermal experiences, treatment rooms, and holistic programming generate high-margin ancillary revenues.

Restaurant & F&B

Multiple dining venues showcase regional cuisine, driving per-guest spend whilst attracting local and day-visitor traffic.

Beach Club

Direct sea access with ~1,000 m² deck provides a high-yield amenity, particularly valuable for summer season optimisation.

Cultural Programming

Edutainment spaces and religious area differentiate the offer, supporting extended stays and community integration.

Investment Rationale: Strategic Positioning

This opportunity presents a rare convergence of favourable market dynamics, secured entitlements, and alignment with macro investment themes. The asset benefits from:

Prime Coastal Positioning

Irreplaceable beachfront location in a supply-constrained, high-growth destination with direct sea access—a scarcity asset in an era of tightening coastal development regulations across the Mediterranean.

Approved Zoning & Entitlements

Tourism-zoned land with confirmed buildable volume eliminates planning risk, compressing time-to-revenue and reducing execution uncertainty compared to greenfield alternatives.

Robust Tourism Fundamentals

Puglia's 60% foreign growth rate and Lecce's 31% regional capture demonstrate sustained, structural demand underpinned by international recognition and authentic destination appeal.

Wellness Tourism Tailwinds

The global wellness tourism sector is forecast to grow at 16.6% CAGR through 2027, with sustainability-focused formats commanding premium pricing and attracting lower-risk, higher-spending guests.

ESG & Green Finance Alignment

Eco-integrated design positions the asset to access EU green investment incentives, sustainability-linked financing, and attract ESG-mandated institutional capital.

Expansion Optionality

Adjacent 470,000 m² land bank provides phased development upside, allowing investors to scale in response to demand whilst securing scarce coastal assets.

Risk Mitigation & Competitive Advantages

De-Risking Factors

- **Zoning certainty:** Tourism designation and approved buildable volume remove primary Italian development risk
- **Diversified revenue mix:** Multiple income streams (rooms, F&B, wellness, beach club) reduce single-segment exposure
- **Year-round potential:** Wellness focus and cultural programming support shoulder-season occupancy
- **Proven destination:** Established tourism infrastructure and international recognition reduce market-entry risk
- **Accessible location:** Dual airport connectivity ensures resilient guest access across European source markets

Competitive Differentiation

- **Authentic positioning:** Salento's cultural depth and natural beauty cannot be replicated
- **Scale & configuration:** 26,000 m² GFA enables destination-resort format with critical mass
- **Beach club access:** Direct sea access is increasingly rare and commands material pricing premiums
- **Sustainability focus:** Eco-integration addresses traveller preferences and regulatory trends
- **Expansion runway:** Land bank optionality creates long-term value appreciation beyond initial phase

The combination of secured entitlements, strategic coastal positioning, and alignment with structural tourism trends creates a defensive yet high-growth investment profile suited to institutional capital deployment.

Investment Opportunity Summary

Strategic Location

Heart of Salento, Puglia's highest-growth tourism zone with 31% regional capture

Substantial Scale

~169,000 m² tourism-zoned, ~26,000 m² GFA with 470,000 m² expansion land

Approved Entitlements

Confirmed buildable volume eliminates planning risk and accelerates time-to-market

Market Momentum

15M+ annual stays, 60% foreign growth, rising wellness tourism demand

"A unique opportunity to develop a sustainable, high-margin hospitality asset in Europe's fastest-growing coastal destination—combining strategic positioning, approved zoning, and alignment with EU green-investment and wellness-tourism mega-trends."

This confidential brief presents the foundational investment case. Detailed financial modelling, architectural concepts, and operational strategies are available to qualified institutional investors under NDA.
